Google Flow (Image-to-Video)

Process

Uploaded each generated image.

Applied cinematic animation prompts.

Generated 5–7 second clips.

Used smooth camera movements.

Maintained Pixar-style visual quality.

Exported individual video clips.

Voiceover Workflow

Script Creation

Generated a concise business-story narration summarizing:

Problem identification

Strategic solution

Business transformation

Final success

Voice Generation

Used AI voice narration for professional storytelling.

Video Editing Workflow

Tool Used

VN Video Editor

Editing Steps

Imported all video clips.

Arranged scenes in story order.

Added voiceover narration.

Added background music.

Applied smooth transitions.

Adjusted audio levels.

Exported final video in 1080p.

Final Output

Deliverables

AI-generated images

AI-generated video clips

Voiceover narration

Final edited video

Video Duration

Approximately 55–60 seconds.

Outcome

Successfully created a complete AI-generated business storytelling video demonstrating how Bob transformed Discount Plumbing into a multi-million-dollar company through strategic pricing and operational improvements.
